Election/Restrictions

Applicant's election of Group IV, claims 25-28, in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 25-26 and 28 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Graham et al (GB 840,542).

Graham discloses a method comprising:

applying first and second etch-resistant patterns (lacquer or varnish, page 4, col.2, lines 56-57) to metal-containing layers on first and second opposing surfaces of a flexible substrate (page 1, col.1, lines 13-15; aluminum on PET with NaOH etchant, page 1, col.2, lines 55-61);

exposing both sides of the web to a liquid etchant by immersing in an etch bath (page 4, col.2, lines 56-57); and

washing the etchant from the web (see the sole figure; wash tanks and water sprays, page 1, col.2, lines 7+).

Claims 25 and 27 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lichtblau (US 3,913,219).

Lichtblau discloses a method comprising:

applying first and second etch-resistant patterns (ink, col.4, lines 41-64) to metal-containing layers on first and second opposing surfaces of a flexible substrate (col.4, lines 3-4; aluminum on polyethylene);

exposing both sides of the web to a liquid etchant by spraying an etchant (col.5, lines 39-49); and

washing the etchant from the web (col.5, lines 49-51).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art shows methods of demetallization of metal from flexible substrates.
